*Stage available depending on the set up and event requirements. Charges may apply.

**Crestron Touch Panel is wall mounted and controls all technology, lighting, blinds (if applicable), room temperature, security, presentations and audio for the space.

***Rouako Room is a multipurpose function space. The area can be used for 4 individual rooms or one large space with foyers for functions, exhibitions or meetings. Therefore the AV equipment set up is flexible dependent on the requirements.

****Dedicated Video Conferencing Suites have dual displays with a dedicated camera for video conferencing, as well as 8 wireless boundary microphones. These rooms can be used for general presentations using the projector screen by itself. However the projection screens are not perpendicular to the table due to architectural constraints.

NZICC offers complimentary high-speed Wi-Fi 6e internet for all guests.

NW Group are our dedicated onsite AV Partner and we would be happy to connect you with a designated representative to discuss your specific AV needs over and above what technology is included in the venue hire.

AV Considerations:

- Labour charges will be applicable for AV set up's over and above the House Technology and where there is Video Conferencing applicable.
- Additional charges will be applicable for alternate room configurations involving the movement and reinstatement of pre-installed equipment.
- Lapel microphones are available at a cost upon request.
- All rooms have a room monitoring camera for security purposes
